

ABAARSO TECH

Abaarso Tech (AT) inspires change in the Horn of Africa through a targeted, high quality approach to education, unprecedented in this region. **AT's mission** is to improve education and thus spur development in Somaliland via a four pronged approach: first, by providing a world-class boarding high school for the country's brightest students; second, by offering internationally competitive undergraduate and graduate university studies within Somaliland; third, by leveraging secondary and university students to provide elementary-level tutoring; and fourth, by leading education and development in the rural community surrounding AT.

However, AT will not be able to accomplish this ambitious task alone; ***we need your support.***

\$1000 provides a full 1-year scholarship to a high school student.

AT is a **501(c)3** organization; visit us online to donate ***tax-free!***
